PROJECTS

Weather Forecast Application 📄 | The Weather App is a simple yet functional web application that provides real-time weather updates for any city worldwide. This project uses HTML, CSS, and JavaScript to create a responsive integrating the OpenWeatherMap API for fetching weather data.

Job Portal Application 📄 | Designed and developed a dynamic and responsive job portal application using React. Implemented user authentication, allowing job seekers and employers to securely register and log in. Built a feature-rich job listing page with search and filter functionalities for job seekers to find relevant opportunities.
